

# Kaniere School

---

*ICT Cluster Meeting*

# Sharing

---

- Mel - Greenscreen, Computer Club, Website & eTime PD
- Michelle - Comic Life, Podcasting
- Teena/Sue S - Kidpix
- Kristine - Spelling City

# Computer Club

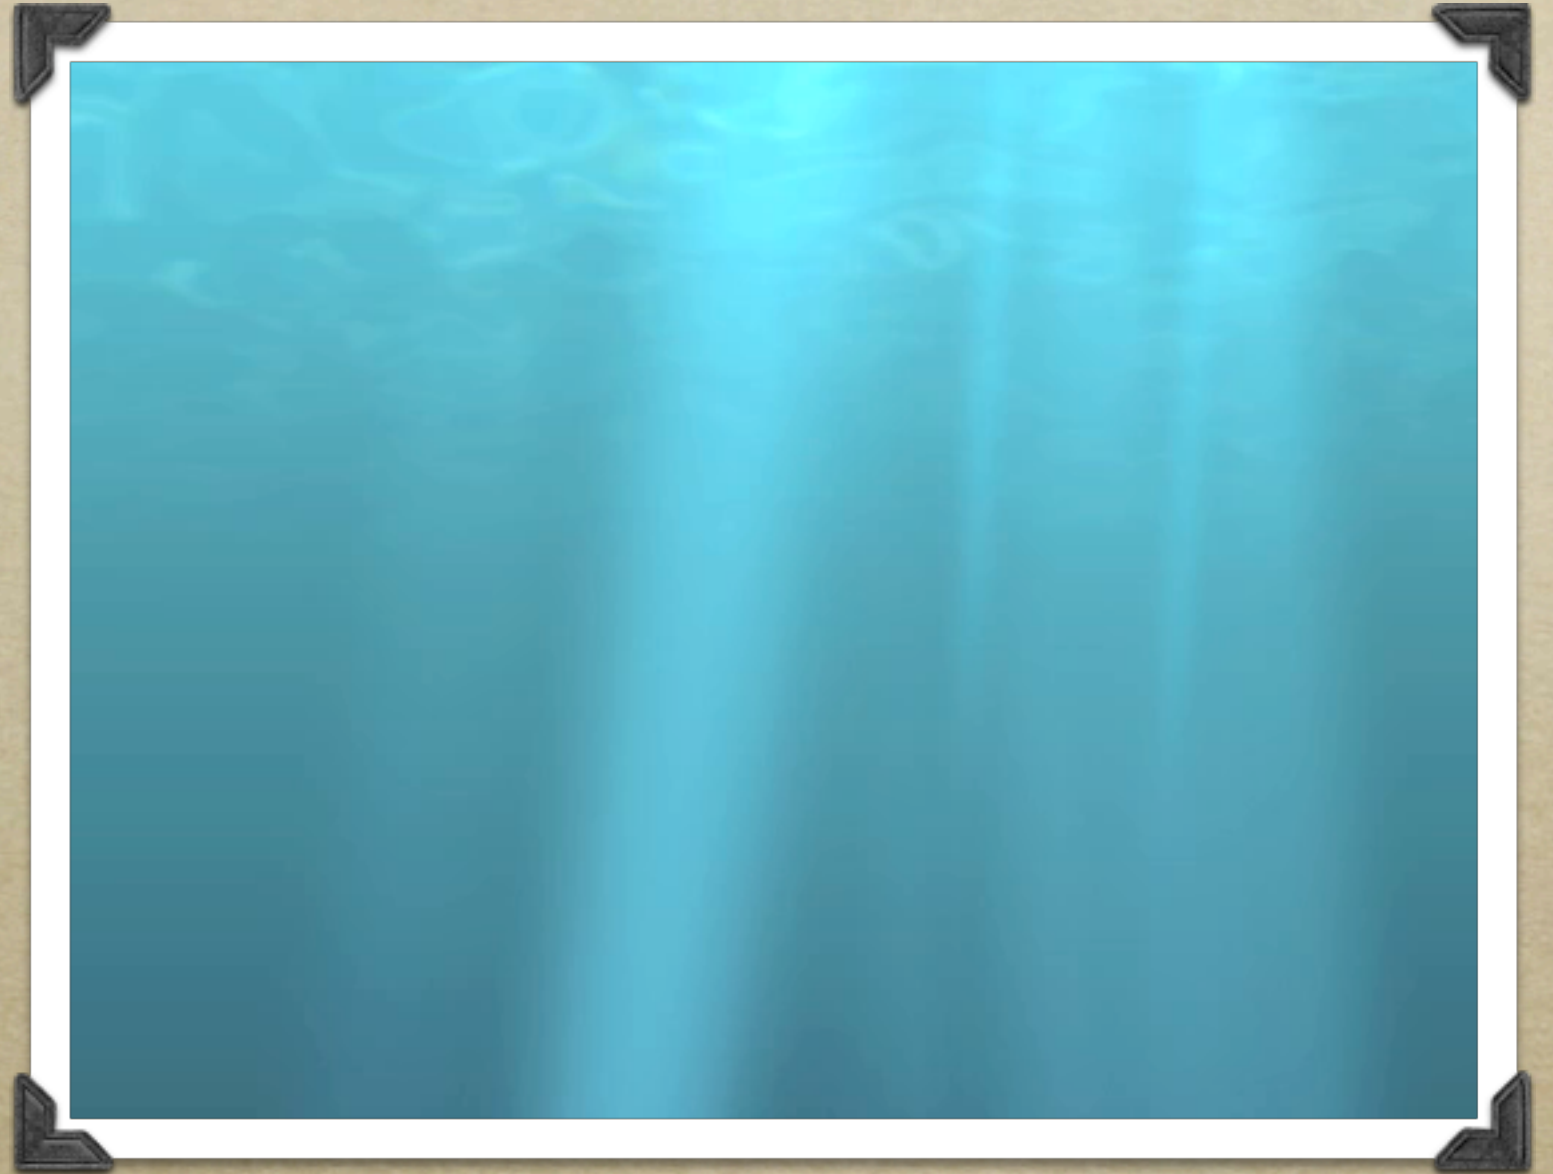

---

- *Two lunchtimes every week we have computer club for the Junior and Senior School.*
- *Students are learning podcasting and greenscreening skills that they can take back to their class to use.*
- *Each student will have their own project to take away at the end and we will be able to put them up on the school websites.*

# Greenscreen

- *One group of children was taught to use the greenscreen so then they can teach other students in the class.*
- *Worked through planning, researching, and putting the video together.*
- *Children reflected on what they have learnt and what they could work on next time.*
- *Next step is for them to learn to video it themselves.*

*Author Study*

# etime Professional Development

---

- *Monday 11th & 12th October*
- *Lead Teacher Day* - A session to plan how the cluster will show evidence of their progress against all their goals and all the success indicators.

A session to plan the variation document. This needs to be completed at the same time as the milestone report.

- *Teachers* -
  - 1) A practical 'hands on' day in which participants gain new knowledge, skills and understanding of how to integrate ICT to foster the development of key competencies.
  - 2) A session to introduce participants to a 'teaching as inquiry' model that focuses on improving students' learning and achievement. This excellent model utilises effective pedagogy, integrates ICT, is aligned to the curriculum including the key competencies, and incorporates assessment including student voice. It provides schools with evidence of increased student learning and achievement - which is the real purpose of the contract.
